Unleash organizational insights

maximize
the value of your
greatest asset

+

make
remote work
work

Where we work has changed and will continue to change

THEN

NOW

The home office trend, which was slowly under way, has leapt forward

15 years

72%

Feared their employers' reaction if they asked for remote or flexible work.

78%

of people who rarely did home office before this time, will continue to do so significantly more often after this period.

Downsides of remote work

Less social interactions & sharing

Substantial increase in repetitive questions on messaging platforms

Siloed behavior and more isolation

Your employees want it

of employees say their company would benefit from accessing more of their expertise

Your business needs it

1 month

of productivity lost every year by not utilizing employees' problem-solving expertise

Data-Driven Workforce Planning

as the key to come out of this crisis stronger

Employee Skills and Expertise

as the foundation to do that

Pulse Poll

How does your organization
capture and manage your
employee skills today?

(check all that apply)

Skill capturing today...

Interviews & feedback from performance reviews

Surveys

Skill trackers

... Falls short & leads to incomplete or wrong decision making

✗ Outdated quickly

✗ Little company specific relevance

✗ Usually a single source

✗ Doesn't scale

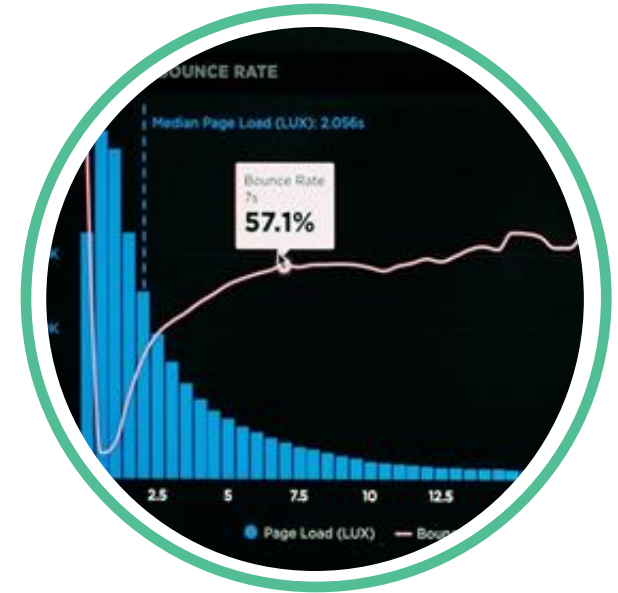

How skill capturing at scale should look like

✓ Automated & Data - Driven

✓ Real time Accessibility

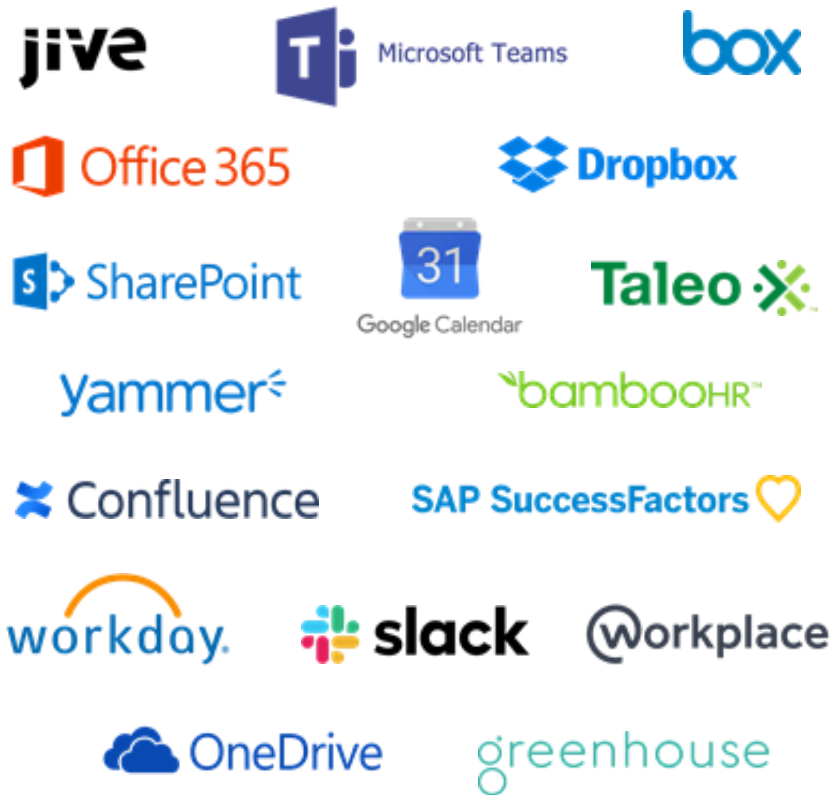

✓ Insight Oriented

The solution? Utilizing AI software to capture skills

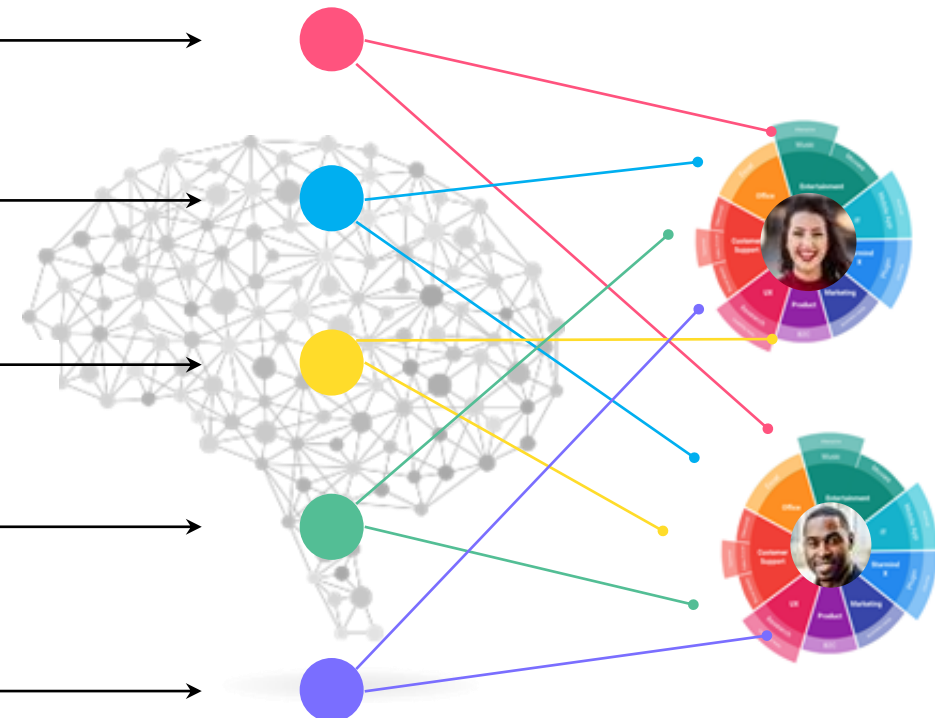

Super-efficient: Connectors feed off your existing tools

Skill and expertise is distributed across many tools

Data used to build a corporate brain that can be easily accessed by employees

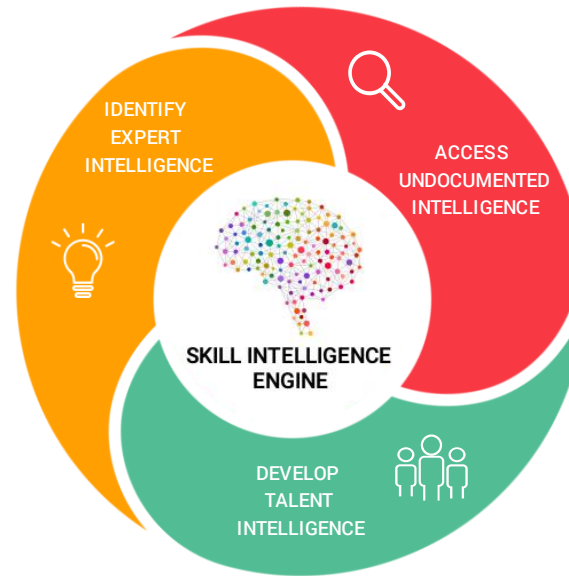

STARMIND

How can HR professionals **lead the C-Suite** through this crisis and beyond?

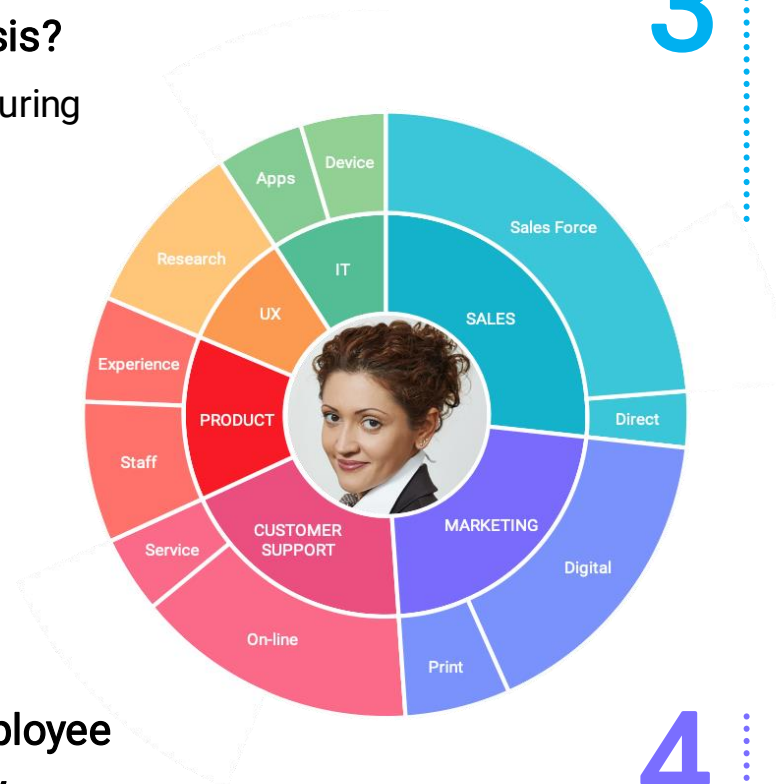

1 How do you approach workforce planning during and after the crisis?

Build a data driven foundation by capturing employee skills at scale quickly

2 How can you identify critical employee skills & experts who are currently available in your organization?

Access skill pool via easy to use interface or integrated app as part of your workflow.

3 How do you retain know-how when employees leave the company?

Capture existing employee knowledge in current IT systems and through intelligently crowdsourcing answers to questions

4 How do you drive impactful and cost-effective learning & development initiatives using real time skill profiles?

Identify skill gaps against requirements and measure applied training knowledge over time

STARMIND
